# POM POMS

**SKILL LEVEL** BEGINNER / EASY

## MATERIALS

- yarn (included here)
- some cardboard (should be firm)
- a pencil or pen
- a pair of scissors (to cut cardboard template/yarn)
- circular items to trace: one big (a glass is perfect), one small (bottle cap or a bit bigger). \*The size of your items will dictate the size of the pom pom

## INSTRUCTIONS IN 10 EASY STEPS:

1. On your cardboard, trace your big circle and then trace your small circle in the middle of the big circle so that it looks like a doughnut
2. Cut out your cardboard doughnut
3. Cut the cardboard ring in one spot from outer edge to inner edge
4. Start wrapping the yarn around the doughnut making sure to wrap yarn around the whole circle. The more wraps you make the fuller the pom pom
5. Continue to wrap the yarn until there is a tiny hole in the middle
6. Carefully cut through the wrapped yarn around the outer edge of the cardboard
7. Secure the pom pom around the middle with a piece of yarn that is 10 inches, tying it as tight as you can! Leave yarn tails on so you can secure it to your project or cut them off once you complete Step 9.
8. Remove the cardboard by sliding it off the pom pom
9. Use scissors to trim the pom pom until it is round with even edges
10. Celebrate your pom pom making success!
